TECHNICAL SPECIFICATION POLYETHYLENE SHRINKING FILM (LDPE)

1- Scope:

This specification covers the requirements of polyethylene film to be used for packaging products in plants according to various coil size.

2- Quality requirement:

The film shall be smooth surface with highest quality and free from irregular edges, and winded with uniform tension.

3- Material: Polyethylene shrinking film (LDPE) by shrink tunnel hot air heating.

- Thickness : 70 microns

- Color : clear

- Film roller dia: 300 mm (max)

- Width : 350 mm Quantity : 4 Tons

Quant

ity: 3 Tons

600 mm Quantity: 3 Tons

- Interior dia of roll: 75 mm (approx.)
- 4 Packing: The material shall be in rolls of continuous length wound and wrapped to be protected from continuation & damages during transportation & storage. packing shall be suitable for sea freight.

Each pack shall have a tag indicating:

- a) Width & thickness of film.
- b) Net weight of roll.
- c) Serial number of roll.
- 5- Sample: To be sufficient for test purposes, provided to reach us before closing date. The sample shall be a basis for accepting or rejecting the offer.
